

Where the Conversion Leaks Are

allbirds.com · CRO Recommendations · August 2026

The site's primary conversion mechanism is guiding visitors from the hero to a product page and into the cart, but this path is diluted by competing CTAs, vague hero copy, and a prominent shipping delay warning that undermines trust. The most valuable fix is to unify the hero CTA to a single 'Shop All' action and replace the delay warning with a reassuring message, which directly addresses the highest-friction elements on the homepage.

Prioritised findings

#	Finding	Severity	Effort	PXL
1	Competing primary CTAs Two equally prominent CTAs in the hero split user attention and dilute the primary conversion path.	Urgent	Medium	5/10
2	Shipping delay warning The prominent 'orders may take up to 30 days to ship' warning creates immediate purchase hesitation and...	Urgent	Medium	5/10
3	Vague hero copy The hero headline 'Wildly Comfortable. Super Natural.' is abstract and doesn't directly address the visitor's...	Urgent	Low	5/10
4	Free shipping threshold hidden The homepage hero promotes 'Wildly Comfortable. Super Natural.' without mentioning the \$100 free shipping...	High	Low	5/10
5	Mega-menu choice overload The mega-menu presents 20+ nav items with multiple sub-levels, risking choice overload and decision paralysis...	High	Low	5/10
6	Heavy third-party script load The homepage loads 63 scripts, which is the usual root cause of slow interaction readiness on mobile.	High	Medium	5/10
7	Hidden cost: shipping fee Free shipping threshold is not clearly communicated on product pages, risking surprise at checkout.	High	Medium	4/10
8	Missing review count The product page shows a reviews section but lacks a visible review count or rating summary, reducing social...	High	Medium	4/10

#	Finding	Severity	Effort	PXL
9	Controls without accessible names 41 of 79 buttons expose no text label, so screen readers and voice control cannot address them and the...	High	Low	2/10
10	Images missing alternative text 3 of 43 images carry no alt attribute, losing both assistive technology support and the image-search traffic...	Medium	Low	2/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
